

Healing Hands Response Force - Complete Cross-Platform Mobile App Wireframe

Expanded from the original concept to show the full Elder and Admin journey for a Flutter + Firebase emergency response app.

System notes and integrations

- 1

Captured on SOS / request
Full name, phone, blood group, medical summary, latitude, longitude, timestamp.
- 2

Notifications
Firebase Cloud Messaging notifies Admin about SOS / assistance and notifies Elder when status changes.
- 3

Location handling
Single GPS snapshot only - no continuous live tracking. Admin opens coordinates in Google Maps via external intent.
- 4

Resolution states
Pending -> In Progress -> Resolved across SOS alerts and assistance requests.
